Meet
the
Jellybots BEN AZZARA

Sat, Feb. 9-Sat, March 9 • Studio 1 Gallery

Reception: Sat, Feb. 9, 2-4pm

What is a Jellybot?

Robot jellyfish — “jellybots” — are speculative miniature machine-type organisms that, in the future, would combine and evolve into more complex creatures. Mixing comics, graffiti and iconography, Azzara draws inspiration from the patterns found in nature, especially tropical fish, insects and birds.
